

A4 DDQ – THE SOLUTION FOR DRY DOCKS

Innovative solutions for port construction

Wefapress Beck + Co. GmbH – the world's first manufacturer of polyethylene sheets – offers A4 DDQ, a high-quality material that can be reused repeatably in shipyards and dry dock applications. Our **DRY DOCK KEEL BLOCKS** are the perfect choice for stable and durable support of vessel during repair and maintenance work. Compared to other materials such as tropical wood, our blocks are particularly robust and can be reused again and again without any degradation.

YOUR ADVANTAGES AT A GLANCE:

- UV-stabilized – durable for outdoor use
- No moisture absorption – no swelling, no weight change
- Weather and UV-resistant
- Break- and splinter-free – no tearing, no breakage, no cracks
- Highly compressed – compressed with at least 600 N/cm²
- Density: 0.95 g/cm³
- Silicone-free & glass-filled – for optimal processing
- Shore hardness D 68 – robust and durable
- Notched impact strength $\geq 80 \text{ kJ/m}^2$ (DIN 53453) – extremely resilient

A4 DDQ

Robust, reusable
and specially designed
for use in dry dock.
