**GROUND PROTECTION MATS
AND OUTRIGGER PADS**

Ground protection mats / Outrigger pads

Especially on construction sites, safe access and a firm surface for every person and vehicle are crucial.

The materials generated during production at Wefapress® are sorted and processed according to type. We then use these materials to manufacture new products according to customer specifications, for example, for the bulk materials industry or construction site logistics, to protect floors and surfaces.

Outrigger pads

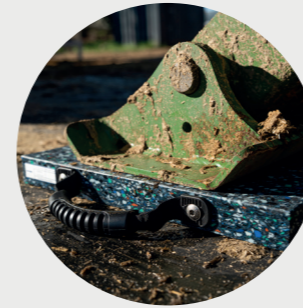

Outrigger pads from Wefapress® provide a secure footing for vehicles, cranes, or other heavy equipment at the work site. They not only prevent the vehicle from slipping but also from sinking into soft or sensitive surfaces. The Outrigger pads are available in various sizes and designs for different applications in the construction industry. **Comfortable carrying handles** make them easy to handle.

Ground protection mats

When used, ground protection mats reliably protect the surface from damage and rutting. This makes them ideal for safely navigating temporary roads and construction sites, as well as for use in parks, golf courses, or cemeteries. An **integrated carrying handle** on both ends allows for easy laying and precise alignment of the mats.

Firm footing
and protection
– wherever it
matters.

Application

- ✓ Mobile cranes
- ✓ Loading cranes
- ✓ Mobile platforms
- ✓ Elevating platforms
- ✓ Concrete pumps
- ✓ Scaffolding
- ✓ Camping vehicles

* for total load on solid ground

Application

- ✓ Securing of temporary roads
- ✓ Road construction
- ✓ Construction sites
- ✓ Parking spaces
- ✓ Green spaces
- ✓ Lawns
- ✓ Sports facilities
- ✓ Golf courses
